

PHASE 6 – PROJECT TESTING

1. Introduction

The testing phase was performed to verify that the LegalEase – AI-Powered Legal Document Generator works correctly and provides the expected output to the user.

2. Testing Objectives

- To verify the document selection functionality.
- To verify the user details form.
- To verify legal document generation.
- To verify empty-field validation.
- To verify Print / Save as PDF functionality.
- To identify and record any issues during testing.

3. Functional Testing

Test Case	Function Tested	Expected Result	Status
TC01	Rental Agreement	Rental Agreement should be generated	Passed
TC02	Affidavit	Affidavit should be generated	Passed
TC03	Legal Notice	Legal Notice should be generated	Passed
TC04	Employment Agreement	Employment Agreement should be generated	Passed
TC05	Empty Fields	Warning message should be displayed	Passed
TC06	Print / Save PDF	Print window with Save as PDF option should open	Passed

4. Test Results

All major functionalities of the LegalEase application were tested successfully.

The application was able to:

- Display available document types.
- Accept user details.
- Generate the selected document.
- Validate empty fields.
- Display the generated document.
- Provide Print / Save as PDF functionality.

5. Issues Identified

During testing, it was observed that switching between some document types may require a page refresh. This issue was recorded for future improvement.

6. Conclusion

The testing phase confirmed that the main functionalities of the LegalEase application are working as expected. The application is ready to proceed to the final documentation and demonstration stages.
